

# Poison Dart Frog

## Discovery Hike

### - Bluff Beach

Get close to nature on this private walking tour. You will be guided by a biologist and learn about the local poison-dart frogs, their coloration, behavior and reproductive system.

During the 3 to 3 1/2 hour tour you can ask all your questions and might encounter more than one species of poison dart frogs, along with much more wildlife and details about plants and animals which inhabit the Islands of Bocas del Toro. In addition to the frogs - which you are promised to see - you might be able to observe monkeys, sloths, agoutis, lizards, toucans, hawks, parrots and more.

After a short stroll along the road along the beach you will enter a private property, where you first spend some time observing the frogs in their natural habitat before you go on a slightly adventurous hike up the hill to be rewarded with a beautiful view.

Price/person: 30\$ (Min. 2, Max. 6 persons)
